## AN INDEX TO THE ANNALS 2000-2011

COMPILED BY Frank Hamilton © 2011

If something is better than nothing, then this index should have some value, but it is not complete. Because the performance annals are still being built, maintaining an index is extremely difficult. This one has been generated entirely by a computer program.

As an alternative to this index, one can search the documents manually while reading them with Acrobat Reader, by typing  $\hat{F}$  (pressing the control-key and F at the same time), then enter the word to search for in the pop-up window.

Things to keep in mind...

Entries in this index do not yet represent repetitions of performances where no casts are indicated in the annals (where that cast was the same as the cast on a previous date), so it can not be used to count performance totals.

This index does not yet represent names from the header lines such as stage directors, choreographers, scenic, costume, and lighting designers, etc.

You may see double entries for some artists because their names were rendered differently in the programmes and newspapers. This sometimes represents a lack of conformity that may be corrected in the future, but otherwise reflects actual spelling errors. In some cases I have not been able to determine which spelling is correct, other times I have inadvertently introduced mistakes while typing. Corrections are always welcome! Names are sometimes spelled differently at two places in the same programme, and some newspaper reviews misspelled almost every single name as well as the roles. Some artists seem to have preferred different spellings of their names over a period of time. Where I have not been able to decide, I have left multiple versions until more evidence becomes available. Frustratingly, many variants appear in the programmes for the same artist such as: Marie/Maria, Anne/Anna, Rose/Rosa, Karl/Carl, and also double consonants in the last names such as 'll' and 'tt' sometimes become single. In most cases I have tried to standardize these for this index, while retaining the programmes' versions in the annals themselves until the correct form can be determined.

The bookmarks provided with the PDF version of this document denote the next new name that begins each page, or each new letter of the alphabet.
